

FIG. 1 is a block diagram of a VoIP network system. The system includes a client server (20) connected to an Internet (11). The Internet (11) is connected to a VoIP network (10). The VoIP network (10) includes a gatekeeper (14) and several VoIP servers (13a, 13b, 13c). The gatekeeper (14) is connected to the VoIP servers (13a, 13b, 13c) via dashed lines (15a, 15b, 15c). The VoIP network (10) is connected to PSTN switches (19a, 19b, 19c). The PSTN switches (19a, 19b, 19c) are connected to PSTN networks (12a, 12b, 12c). The PSTN networks (12a, 12b, 12c) include telephones (12a, 12b, 12c). The system also includes a U.S. partner (12b) and an international partner (12c).
